

Summary

AI Robotics Engineer with an M.S. in Electrical Engineering, focused on ROS 2, Isaac Sim / Isaac Lab, MoveIt 2, cuMotion, visual servoing, and physical-robot validation. Experienced in connecting perception, force-guided contact search, robot learning, policy inference, and Dockerized robotics software into practical manipulation workflows.

Key Results

3-4x imitation-learning / GROOT-VLA training-data throughput	70% → 90% cable-insertion success in 10 trials
---	---

Experience

- AMTRAN TECHNOLOGY CO., LTD. | AI Robotics Engineer

May 2025 - Present | New Taipei, Taiwan

 - Built ROS 2 control and simulation workflows for industrial and collaborative robot platforms with Isaac Sim / Isaac Lab, MoveIt 2, and cuMotion, covering motion planning, collision handling, pick-and-place, and cable tasks.
 - Delivered Isaac GROOT N1.7 data conversion, model training, and policy inference, separately validating virtual-data training followed by real-world inference and real-data training/inference workflows.
 - Built a two-part ROS 2 / WebSocket training-data collection flow that automated robot-arm tasks and recorded actions, images, robot state/actions, and timestamps, reaching 3-4x manual throughput and reducing manual staffing needs by two operators.
 - Developed YOLO OBB / OpenCV visual servoing for HDMI insertion and AprilTag / OpenCV connector localization for cable unplugging; integrated wrist-mounted six-axis force/torque sensing and force-guided contact search into final insertion alignment with bounded spiral micro-search. Validated the integrated workflow on the physical robot; overall cable-insertion success reached 90% in a 10-trial test from a 70% baseline.
- ISCOM | Software Engineer Intern

Feb 2022 - Jun 2022 | Kaohsiung, Taiwan

 - Participated in backend API development, frontend integration, and web feature implementation using C#, ASP.NET MVC, JavaScript, jQuery, MS SQL, and Git.

Skills

Robot Control & Validation	ROS 2, Isaac Sim / Isaac Lab, MoveIt 2, cuMotion, Visual Servoing, physical-robot validation
Physical AI & Robot Learning	Isaac GROOT N1.7, VLA, Policy Inference, Imitation Learning, Robot State / Action
Perception & Visual Inspection	YOLO OBB + OpenCV, AprilTag, RealSense, Hand-Eye Calibration, six-axis force/torque sensing, force-guided contact search, PatchCore anomaly detection
Robotics Software & Integration	Python, C++, FastAPI, React / TypeScript, WebSocket, Docker, Linux

Education & Honors

- M.S. in Electrical Engineering, National Taiwan Normal University | Sep 2022 - Jul 2024
- B.S. in Computer and Communication, National Pingtung University | Sep 2018 - Jun 2022
- Honors: RHCSA; FIRA Roboworld Cup First Place; National Technical Creativity Competition Third Place
